The Department of Veterans' Affairs published very useful educational resources for both teachers and students in regards to War, Peace and Peace Operations.

The publications are resourced with interactive activities engaging with primary and secondary sources. It is a DVD Resource Kit, however, teachers can access the documents containing the different topics regarding Australia and the Vietnam War. Students can explore this significant period in Australia history from 1962 to 1973, through various images, film, and various excerpts.

This website provides a rich collection of Transcript Database on interviews about a particular event of conflict that Australians have been involved in. There are transcripts of interviews of soldiers, nurses and various others who were involved. These transcripts will need to be sorted accordingly as there might be information that are not age appropriate for students in your classroom. However, in saying so, this website will serve to be a useful tool to enrich student's perspective on the lives of people during this time.
